*LV panel production*

evotech.hu/en

The evotech Ltd. has more than 25 years of experience in low voltage panel production. We are one of the largest panel builder companies in our country. We provide complex and continuous cooperation with our clients during the design and production activities that are considered significant added value to our clients.

We have strong cooperation with our clients during the LV panel manufacturing process in order to find the optimal engineering solutions.

Our products portfolio ranges from control distributors panels up to 7300 A power switchboards.

We obtained SIEMENS SIVACON S8 and Schneider Electric OKKEN licences, that technical competency allows us to manufacture industrial withdrawable switchboards up to 7300A.

We use the wide range of device and equipment systems of our suppliers Siemens, Schneider Electric, ABB, Eaton and Rittal.

We can test and simulate the manufactured equipments in our workspace and we can do installation and set-up works on the site.

Panel- and component production

- Pre-engineering
- Construction design
- Power switchboards production up to 7300 A
- MCC & Control panel production
- Manufacturing of copper component
- Factory test
- On site panel installation

**Integrated quality management**  
Our certified integrated quality management systems guarantees our high-level equipment manufacturing activity for our clients.  
**EN ISO 9001:2015**  
**EN ISO 14001:2015**  
**ISO/IEC 27001:2013**  
**EN ISO 45001:2018**
